### DETAILED ACTION

1. Applicant's request for reconsideration of the election/restriction of the last Office action is persuasive and, therefore, the election/restriction of that action is withdrawn.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alexander, Jr. (US H379) in view of Huspeni et al. (US 6,299,475).

Alexander, Jr. discloses electrical connector [figure 3] comprising details of a housing, a cover for connecting a cable.

However, Alexander, Jr. does not disclose a detail of a contact disposed in the housing and the cover.

Huspeni et al. discloses an electrical connector [figure 6] comprising details of insulation displacement connectors (IDC) disposed between a cover and a housing.

Art Unit: 2839

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify connector of Alexander, Jr. to provide the IDC as taught by Huspeni et al. for the purpose of facilitating the insertion of the wires.

The method steps are inherit in the product structure.
